Ayon Odin (Stereo version)

Many of our clients have asked for a stereo tube power amplifier that meets Ayon's outstanding design standards, by using the same kind of Ayon's super triode power tube employed in our Vulcan monoblock amplifier. The Odin is the answer and offers true single-ended operation with the ability to deliver high current & voltage for best sound performance. Throughout, the Odin is engineered without compromise. The speedy bass with dynamic power, life-like realism coupled with 3D airy soundstage, smooth-transparent midrange and frequency extension opens a new musicality quality in its single-ended triode stereo power amplifier class.

Ayon Odin (Monoblock version)

For the ultimate in flexibility, the stereo Odin can be fully upgraded to an Odin monoblock status; it is easy to convert to a monoblock at any point in time. Just add a second Odin to enjoy the benefits of true monoblock operation. The monoblock version of the Odin supplies a prodigious 120 watts of output power per channel.

Single-Ended Triode Amplification

Ayon's state-of-the-art triode vacuum tube amplifiers provide music lovers worldwide with an authentic listening experience in their home environments. They offer abundant power resources unavailable from conventional designs while fully maintaining and expanding the traditional qualities of the single-ended topology.

Research and development of our triode amplifiers is conducted by a team of renowned experts at our high-end manufacturing facility in Austria.

Absolute tonal neutrality, outstanding dynamics and a so far unknown level of resolution are trademarks of our amplifiers, complemented by an explosively fast and uncoloured bass and high power triode performance. Their sound staging and ambient retrieval equals the finesse of the legendary low power triode designs while leaving behind their disadvantages of high distortion, coloration and limited dynamic reserves.

Advanced zero feedback class A circuitry and cutting edge output transformer design make Ayon triode amplifiers recreate music with irresistible magic and authenticity.

Specifications:

| | |
|--------------------------|--------------------------------|
| Class of Operation | PSE-Single-Ended, Pure Class A |
| Tube Complement | 4xAA62B, 6x6H30 |
| Load Impedance | 4 & 8 Ohms |
| Bandwidth | 10Hz-50kHz |
| Output Power | 2 x 50 Watt, 1 x 120W Mono |
| Peak Output Power | 2 x 80 Watt, 1x150W Mono |
| Frequency Response | 8 Hz - 35 kHz/ 0 dB |
| Frequency Response | 7 Hz - 100 kHz/ -2.5 dB |
| Input Impedance at 1 kHz | 100K Ohm |
| S/N ratio at full power | 98 dB |
| Hum | 0,003 V |
| NFB | 0dB |
| Inputs | 1x RCA, 1x XLR |
| Dimensions (WxDxH) cm | 50x40x25 cm |
| Weight | 43 kg |

Finish: black
